

Photo Album Readme

IMPORTANT: Admin account

login : admin

password: password

Note: Some features can only be accessed by clicking on the “edit” button. For example, to delete albums, click on “Edit”, choose albums by clicking on them, then click on the trash icon in the lower right corner.

Extra credit: We added a photo sharing feature and a like feature for photos. If a user would like to share the photos, they can opt in to sharing photos to all other users by checking the “share albums and photos” checkbox in the “view other users” tab, which can be reached by clicking on the “view other users” button on the main Albums screen. Here you can choose other users and view their albums and photos, without the ability to add, edit, delete, etc. if they allowed sharing of their albums and photos.

You can then like and/or unlike their photos. It likes the photo if the user has not previously liked it and un-likes it if the user already likes the photo and clicks on the button. You can also shamelessly like your own photos.
